

**W/C: 23/03/2020**

Subject: Mathematics

Teacher: Mr Foster

Class: 11MA3

Google Classroom Code: erlippn

### Instructions

**1. Pupils have three revision packs to be working through.**

These are also saved in their google classroom area. They are labelled Revision Packs 1, 2 and 3. Please work through these one section at a time.

The answers are also available in this area but for checking purposes only. Please mark with a green pen and make the necessary corrections.

**2. Pupils have six exam practice assessments to attempt.**

Most pupils have already done the first two that there are four more to attempt. These are to be attempted in your exercise book.

The answers are also available in this area but for checking purposes only. Please mark with a green pen and make the necessary corrections.

**3. Pupils have four exam practice mini papers to attempt. These are sections A to D.**

Each paper has 7 questions. Part (a) is very very similar to part (b). Part (b) is only attempted if part(a) was incorrect.

The answers are also available in this area but for checking purposes only. Please mark with a green pen and make the necessary corrections.

**4. Hegarty Maths**

Pupils have taken home their question level analysis sheets and have up to 8 papers. Therefore, Hegarty can be used to improve their area of weaknesses. The last column of their 'question level analysis sheet' is labelled clip number. It is these clip numbers that need to be watched along with the exercises attempted.

Hegarty Maths needs to be taken seriously.

Using the orange exercise book:

- a) Write down the Question Title and clip number. Eg Index Rules (107)
- b) Make notes from the video(s).
- c) Attempt all questions. Copy these down and show all your working.
- d) Follow all presentation rules!

(I appreciate that there will be some questions that are Graded 8 and 9 and therefore difficult to understand)

On our return, I will be expecting to see plenty of work attempted.
