

**W/C: 23/03/2020**

Subject: Mathematics

Teacher: Miss Thompson

Class: 11MA8

Instructions – Week 1

Please answer as many questions as you can on the two exam papers called 'Changed Papers'. These are similar to your mock exams, but the questions have been changed slightly. We will have a look at these to support our revision when we are back at school. Paper 1 is non-calculator and Paper 2 is calculator. If you need mathematical equipment for any questions, leave them and you can complete them at school.

Instructions – Week 2

Please log on to Hegarty Maths and complete clips 56 and 329. You also need to **choose one** of clip 548 or 549 (549 is more challenging). These are key GCSE topics that everyone needs to practise. For each clip you need to watch the video so you know what to do, make some notes so you know how to answer the questions and then complete the quiz. Please make sure that you show your working, use green and purple pen to mark your work as you go along and include a www and ebi at the end of each task.
