## Year 11 – Art – Mr Nel

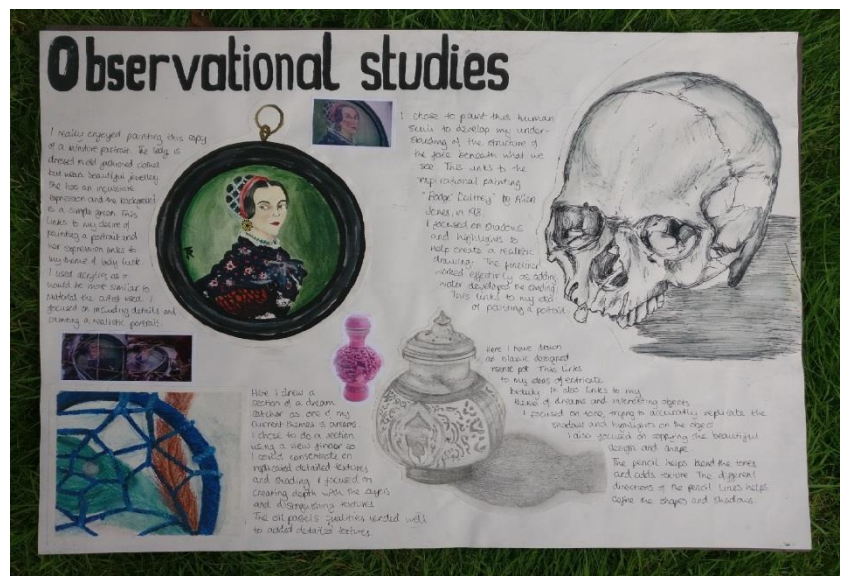

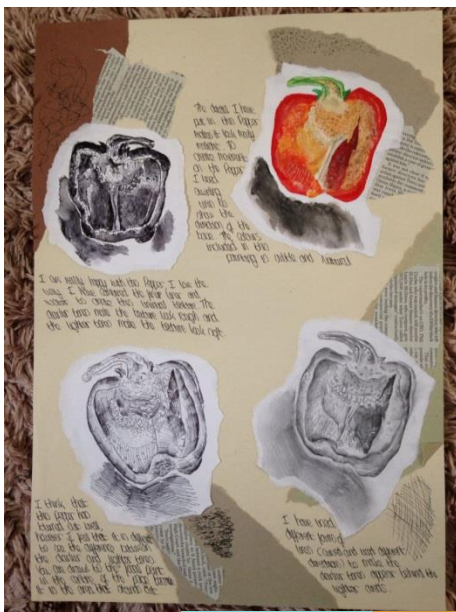

Please note: these tasks should last at least 20 minutes to an hour each.

There are four areas that you must provide work for leading up to the real exam.

They are:

1. Artist investigations
2. Experiment with materials and ideas
3. Observational studies (drawings/paintings and photographs from things in the real world.)
4. Design ideas and experiments with “compositions” for the final piece

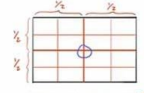

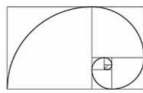

We have been concentrating on the first two in lesson since Christmas, so really it's 3 and 4 that you need to be working on now. Use the internet to help you.
