Students with Disabilities

All pupils, including those with disabilities, share the same statutory entitlement to a broad and balanced curriculum. Those disabled pupils who have special educational needs will be educated in the light of the School's SEN Policy.

The School is proud of the success it has had in successfully meeting the needs of a variety of pupils with disabilities, including children with visual or hearing impairment. Existing facilities provided to assist access to the School by students with disabilities include:

- Disabled toilet facilities
- Disabled ramp access to the majority of key areas in the school
- A proportion of KS3/KS4 curriculum subjects are taught at ground level
- An accessibility Plan is in place.
- Lift access to all floors in the South Block
- Highlighted stairs.
