

Course Breakdown:

A) Controlled Assessment:

NEA2 - Food Preparation Task (Nov-March) 50% of GCSE

B) Final Exam (June) 50% of GCSE

A) Controlled Assessment:

(ii) NEA2 - Food Preparation Task (Dec-March) 50% of GCSE

This piece of controlled assessment will be started after the October half-term. A significant proportion of the marks for this NEA are awarded for practical work. This involves making three separate dishes (made in different lessons) to demonstrate technical skills, leading on to a 3hr practical exam where you are required to make two different dishes, with accompaniments, that together demonstrate a wide range of high level skills.

Resources to help with this work will be found in the “NEA2 Food Preparation Task 2020-2021” folder on the U-Drive, shown in **1.** overleaf, also on Google Classroom.

There will be a range of resources in the folder which includes a range of reliable recipes and information on practical skills that should be demonstrated. In addition, there will be templates that can be used and guidance on producing time-plans.

In preparation for the practical element of this task, it would be very beneficial for you to cook on a regular basis at home, making a range of dishes that demonstrate medium and high level skills. The dates for the **3hr practical exams** tbc.

B) Final Exam (June) 50% of GCSE

Time: 1 hour 45 minutes

Section A: 20 multiple choice questions from all sections of the course: **20 marks**

Section B: 5 questions of different styles from different sections of the course: **80 marks**

The subject content is broken down into five sections:

- 1 Food, Nutrition and Health
- 2 Food Science
- 3 Food Safety
- 4 Food Choice
- 5 Food Provenance

Information on all sections can be found in the on-line textbook and revision guides, as well as in your folder and exercise book from Years 9-11. A breakdown of the specification content can be found on the U-Drive – see **2.** overleaf. You would benefit from using a range of different methods of revising – making mind-maps, watching films and animations, answering questions, learning key terms, completing quizzes and activities. The interactive textbook, SENECA and the revision/study guides will provide all these things for you as well as giving you more information about the types of questions you may be asked to answer.
