

# Welcome to Design Technology

## The DT Team:

Mr D Holmes :2nd in Faculty

Mr G Ramage :Teacher

HEALING SCHOOL

A Science Academy

## What you are going to learn in Year 7:

In Design Technology (DT) you will be able to challenge your creative and practical designing skills in the world of working with timbers, plastics and electronics. You will learn how to solve problems by using your imagination to design, make and evaluate a product that can help fix a situation or every day problem that we face.

## An introduction to Design Technology :

Why do you think that it is important that we make existing designs better ?

Mobile phones have changed many times through out history. Advances in electronics and computer software have allowed mobile phones to become more compact and sophisticated.

Use the space below to make a list of the benefits that modern mobile phones have over the original house phone.

### **An introduction to Designing**

*When you begin lessons at Healing School you will need to be prepared with all your equipment each day for the lessons you will be studying. Your challenge is to DESIGN (by Sketching) an equipment storage system that can hold all your main equipment for classroom based lessons (pencils, ruler, colouring crayons, mathematical equipment, post it notes etc). Ensure you add words to explain what your idea would be made from and how it will work.*

*Equipment Storage System*

**I was previously at \_\_\_\_\_ Primary School.**

**Topics I have already studied in Design Technology:**
