

Welcome to Science!

The ScienceTeam:

Miss N Crosby:Head of Faculty

Mr W Harrison & Mr S Crosby 2nd in Faculty

Mr M Jackson, Mrs S Plant, Mr R Ingham, Mrs

J Day & Mr K lamb: Teachers

Mrs Leadbeater & Ms Green Technicians

HEALING
SCHOOL

A Science Academy

What you are going to learn in Year 7?

In your Science lessons you will learn a range of practical skills and build your knowledge about the following topics.

Substances and ways to separate them; the Earth and chemical reactions; speed, gravity and electricity; light and sound energy and the fundamentals (basics) of Biology.

An introduction to Science:

There are three main science subjects: Biology, Chemistry and Physics.

What do you think each of these involves? Show your ideas as a picture.

Can other people tell which is which just from your picture?

An important part of all three sciences is carrying out practical work and investigations.

So that everyone in the science lab is safe we all follow lab rules. Some of them are written below.

For each one try to write an explanation about what might happen if we didn't follow that rule.

Wear eye protection

Stand up when experimenting

Wash your hands carefully after practical work

Report any accidents and breakages

The Science team are looking forward to meeting you and sharing our exciting subject.

If you can't wait, why not ask an adult to look on the Healing School facebook page & try out some of the science activities that are being posted?

Remember to stay safe!

Topics I have already studied in Science:
